Hiya Jim and Holly:

This trip keeps getting better and better! This is to confirm that I will be attending. I have also reserved a flight on May 2 and May 5 (round trip) with Salmon Air for passengers Scott Bailey, Lauri Hanauska-Brown and possibly Martha Wackenhut (she is not yet confirmed) - all IDFG nongamers. If Martha opts not to go, we will have space on the plane for another person. Look forward to it and will bring the serious hiking boots!

Subject: Bat workshop planning

Hello,

We are coordinating the details of the bat workshop at Taylor Ranch Field Station, May 2-5. Plan to fly from one of the air taxi services at 9 am Sunday 2nd and fly out at 9 am Wednesday 5th. We will spend one night camped out near Cave Creek where we will conduct a bat cave emergence survey. We will hike 7 miles to Cave Creek. Taylor Ranch will provide tents and pack animals to transport gear. You will need your own sleeping bag and pad; a daypack is handy for your personal gear on day hikes.

Please confirm 1) if you are planning to attend, 2) if you have made flight arrangements and with which air service and other participants, 3) if you need assistance coordinating flight sharing.

The local bats have been active for several weeks now. We are looking forward to the bat surveys in May. Katie has lined up equipment and permits for the workshop.

Diane + Joel + Jennifer Soules + Carrie McCall

Hey there Jim and Holly!

Sorry it has taken me forever to write you guys. My email has been down. For some reason, I can receive emails, but can't send any. A real pain in the neck!

Anyway, talking about coming into Taylor with Jim Morris. I am going to be in Panama from the 27th of March through the 26th of April. I see that you told Jim the best time would be in April. For me, it would have to be sometime after the 26th. (I am really excited about going to Panama and handling up to 75 different species!) Hey, did you guys get that email I sent a while ago with the attachment about what I am going to be doing when I'm there? I sent that to you and Janet, but never heard back from either of you. So I'm not sure if you got that or not.

Well, let me know. Take care out there!

katie

>Hi Jim,

>

>I don't remember whether you heard from me last fall or not. Jim and I are definitely interested in you coming to Taylor Ranch next spring on a bat trip - April may be the best month. Katie Gillies said she would also come in. She needs to train us on the use of the Anabat, since her machine now belongs to Taylor Ranch Field Station and we would like to continue surveys with students. We would like to have you and Katie here together when we can all go out in the field and record bats and see what species we have here in the spring. You can show us the ZCAIM module and how it works. You and Katie can

discuss the various uses of the Anabat. We hope to establish a protocol for bat surveys on Big Creek . . .
